

**Clear PET films for the
Production of Integral Cards or
Laminations on Press**

OLSC012

Super Clear face laminate for integral cards. Laminate has premium special high gloss top coating for lasers and is still signature compatible. This topcoat is used where ultimate clarity and gloss is a must and will still accept laser toner. Designed for color laser printers and will work very well in standard laser printers. This is our most popular face laminate when high color print is used. Wet out is very good. This laminate makes your card look great. Now HP indigo Printable too!

OLMX025/050

Matte laminate for integral cards. Designed for digital printers where heavy color will be imaged. Top coating is designed for color laser printers and is signature compatible. Matte finish. Will work very well in standard laser printers as well. The top coating is applied with a heavy coverage to maximize the anchorage of the color toner. Very good for high speed lasers such as IGEN.

Digital Matte Laser Top Coating

OLIM025/050

Ink jet compatible and laser compatible top coating. This laminate is ideal when your integral card form will be used in a variety of printers. It is truly a catch all. The matte coating is signature compatible as well. Photo printing should be tested. Run on a laser, impact, or ink jet printer. Also good for type writers.

OLFM050

PLA film is corn based and compostable. This is used instead of petroleum based polyester. We add our premium matte laser top coating and our water based adhesive to make the perfect laminate for your earth friendly ID card. We suggest a laminate face and back to make an integral ID card. Our premium laser top coatings provide a barrier against the heat to ensure good laser performance. High heat printers must be tested for compatibility with this film.

OLNCR050

Use this film to apply to the back of an integrated magnet to allow the magnet to be laser compatible. This 101 adhesive is designed to work with the anti block coating applied on the MC225 magnet. Adding this patch to the integrated magnet also improves other processing such as folding and inserting. This protective patch can also be added to the magnet to make an integrated magnet on a post card eligible for automatic rates. Check with your local postmaster.
